

Bird Equipment LLC

Oil & Gas Solutions

Unsurpassed Quality Equipment

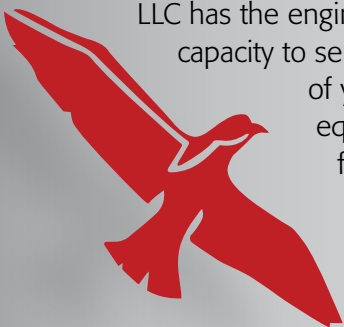

Equipment packages, such as shown here, are ordered and ready for your installation without having to worry about sending multiple trucks to other locations.

The Company

Founded in early 2004, Bird Equipment LLC has grown from a small vessel fabrication and oil field supply shop to a company capable of producing Oil & Gas Process and Handling equipment and piping, satisfying the needs of our customers and industry requirements. With better than 50,000 square feet of shop space in Burns Flat, Oklahoma, another 20,000 square feet in Noble, Oklahoma and the addition of 45,000 square feet in Ohio, Bird Equipment LLC has the engineering and capacity to service most of your process equipment or fabrication needs.

Specialties and Experience

We specialize in process, fluid, and gas separation. Whether your needs are as simple as a scrubber pot for instrumentation gas, or complex processing requirements, requiring a Gas Production Unit using the latest in electronic burner management systems and safety shutdowns, Bird Equipment LLC can assist from design to delivery. We specialize in various designs and capacities related to vertical or horizontal separators, Treater, GPU's, Dehydration Units, Filters, and much more. With well over 100 years combined experience in field service, engineering, and design, Bird Equipment has the people in place to assist you in making the right production equipment selection. Provide Bird with your process requirements, and Bird will provide you with a solution.

Bird can provide solar power accessories for remote locations, which is becoming more of an industry standard.

Trailer mounted flow testing separators, complete with all of the instrumentation and accessories needed to provide location and well flowing service. All piped and painted to meet your service requirements.

Processes Foundation

ASME Section VIII, Div. I, provides the best set of standards and guidelines for the industry, serving as the foundation for all of our processes and procedures for manufacturing your equipment. Our QC Department monitors all of our equipment until it is in your hands, ensuring what we manufacture meets or exceeds your expectations.

Our Standards

From low volume, pressure, and liquid capacities to high volume, pressure, and large liquid capacities, from Slug Catchers to GPU's and beyond, Bird Equipment LLC can design and build your equipment to suit your requirements. Along with having our ASME U-Stamp, Bird also holds a National Board R-Stamp to repair or alter any existing equipment. Having repaired or modified equipment throughout the US, our services meet or exceed the standards. We will not ship a product until it meets our own internal quality requirements.

Knowledgeable/ Experienced People

H₂S Bubble Towers, Horizontal Heated Separators, Indirect Line Heaters, GPU's, Oil Stabilization Towers or VRT's, Launchers/Receivers, and more are just a few of the products Bird offers. With the addition of a Flare and Combustor Division in 2014, Bird now offers new products meeting the new EPA guidelines of the Oil & Gas market. Bird continues to provide new designs and products to meet your changing and challenging needs. All of our equipment meets or exceeds the materials guidelines for the Oil & Gas market, and are inspected and tracked to ensure conformity by our QC Department.
